### LATEST QUARTERLY COMMENTARY

During the first quarter of 2019, most of our long positions contributed positively to our returns. Our largest contributors from our long book were Firan Technology (FTG), Martinrea International (MRE), and Gluskin Sheff (GS).

On the opposite side, our detractors this quarter were mostly from our short positions.

For more detailed commentary, please refer to our Q1-2019 quarterly report, which can be found on our website.

### LONG/SHORT STRATEGY

#### LONG POSITIONS

On the Long side we invest in companies that demonstrate high quality characteristics, fall within our circle of competence and sell at a discount to intrinsic value.

On the short side we look for companies that exhibit traits of systematic under performance and which provide excellent risk management characteristics at the same time.
