### LATEST QUARTER COMMENTARY

During Q4/2021, some of our largest contributors were: Franklin Covey (FC US) and Issuer Direct (ISDR US). On the opposite side, our detractors included DIRTT Environmental (DRT CN) and Sangoma Technologies (STC CN). Franklin Covey's transition to a subscription model continues to pay off with yet another quarter of strong organic growth in recurring revenue and margin expansion. We expect the company to continue to execute on its strategy which is bound to result in further upside in FCF with FC now yielding >7% yield on EV.

### ANNUALIZED PERFORMANCE NET OF FEES

### NET LONG SECTOR ALLOCATION

### LONG/SHORT EQUITY STRATEGY

#### LONG POSITIONS

On the Long side we invest in companies that demonstrate high quality characteristics, fall within our circle of competence and sell at a discount to intrinsic value.

On the Short side we look for companies that exhibit traits of systematic under performance and which provide excellent risk management characteristics at the same time.
