### LATEST COMMENTARY

The surge in US power generation demand presents a high-conviction growth industry, driven by the electrification of various sectors, advancements in renewable technologies, and the burgeoning demand for data centers powered by artificial intelligence (AI) and machine learning (ML). Central to this theme is the urgent need to modernize and enhance the US electric grid, which is currently ill-equipped to handle the anticipated growth in demand.

### ANNUALIZED PERFORMANCE NET OF FEES

### SECTOR ALLOCATION

### INVESTMENT STRATEGY

Disclaimer: This document does not represent an offering of securities in any jurisdiction and is for informational purposes only. The securities described herein are only available to Accredited Investors in Canada by private placement in accordance with applicable securities laws. The information disclosed in this summary is incomplete and is qualified in its entirety by the Offering Memorandum of the LionGuard Performance Fund LP. The data for Scotia Canadian Hedge Fund Index & HFRI Equity Hedge Total Index is the latest available. Historical performance data (up to March 2024) pertains to the carve-out of long positions of the LionGuard Opportunities Fund LP, illustrating the performance of its fully invested long segment. Class C units fee structure is subsequently applied to compute net equivalent returns. LionGuard Capital Management Inc. does not warrant the accuracy of the presented information nor is responsible for any actions taken because of this report. Upside capture ratio (downside capture ratio) is computed using the average monthly returns divided by the average monthly returns for S&P/TSX Total Return Index when its returns are positive (negative). The indicated rates of returns do not consider sales, redemption, distribution, expenses, optional charges, or income taxes payable. Some of the assumptions or opinions contained herein are the views or opinions of the firm and are based on management's analysis of the portfolio performance.
